Introduction

This document sets out the Learning, Training and Development offered by the Teeswide Safeguarding Adults Board (TSAB). One of the key functions of TSAB is to provide a learning and development framework to ensure that everyone who comes into contact with adults who are experiencing, or, at risk of abuse and neglect can respond in an appropriate way as determined by the Teeswide Safeguarding Adults Inter-agency Policy and Procedure.

National Context

The Care Act 2014, implemented in April 2015 puts adult safeguarding on a statutory footing for the first time and places responsibility onto Local Authorities to create Safeguarding Adult Boards (SABs). The main objective of the TSAB is to assure itself that local safeguarding arrangements and partners act to help and protect adults who:

- have needs for care and support (whether or not the Local Authority is meeting any of those needs)
- are experiencing, or, at risk of abuse or neglect
- as a result of those care and support needs are unable to protect themselves from either the risk of, or the experience of abuse or neglect.

It is recognised within the Department of Health Care Act guidance, published October 2014 that **anyone** can witness or become aware of information suggesting that abuse or neglect is occurring. Regardless of how a safeguarding concern is identified, everyone should understand what to do and where to go locally to get help and advice, and it is vital that professionals, other staff and members of the public are vigilant on behalf of those people who are unable to protect themselves.

Local Context

The TSAB uniquely covers four local authority areas, namely: Hartlepool Borough Council, Middlesbrough Borough Council, Redcar & Cleveland Borough Council and Stockton-on-Tees Borough Council. Statutory partners include; the four Tees Local Authorities, Clinical Commissioning Groups (CCG) and Cleveland Police, plus a variety of other key organisations.

Cultural Competence

Cultural competence is a key aspect of professional practice which describes the knowledge, values and skills required to work in an inclusive manner that reflects the diversity of local communities. To achieve this there are three key attributes that professionals need:

1. Knowledge and understanding of:

- a. Their own culture
- b. Any culture bias they may have
- c. The concept of culture and how this can affect beliefs and behaviours
- d. Specific cultural knowledge.

2. A range of values and attitudes, including a commitment to:

- a. Valuing individuality and the role which culture plays in this
- b. Respecting individuality and the role which culture plays in this.

3. A range of skills including:

- a. Culturally competent communication
- b. Culturally competent assessment
- c. Culturally competent delivery of person-centred care.

Professionals should consider any gaps in their knowledge and development needs in relation to this subject. This NHS resource provides a further useful insight:
